

SARA SHARMA

Data Scientist | AI Engineer | Software Developer

📞 +91-7427898175 | ✉ sarasharma2827@gmail.com | 🐙 Github | 🔗 LinkedIn

Professional Summary

AI Engineer with strong Business Analysis skills, bridging AI/ML, data analytics, business requirements, and stakeholder needs to deliver data-driven solutions.

Work Experience

- NITI Aayog** | *Data Management & Analytics Intern* Aug 2026 – Present
- Supporting policy work through prescriptive ML model and forecasting; driving evidence-based government decisions.
 - Conducted business analysis by gathering requirements, analyzing processes, and translating policy into analytical solutions.
- Fluentgrid Ltd.** | *Python & Machine Learning Intern* June 2025 – Aug 2025
- Developed scalable applications and data pipelines using Python OOP, Tkinter & complex SQL operations.
 - Executed end-to-end data workflows utilizing Pandas & NumPy, and trained supervised time-series ML models.
- Inferrix Greentech** | *AI Research Intern* Jul 2024 – Sep 2024
- Developed a PINN model that fused historical HVAC logs, building layouts, and weather data with real-time IoT sensors
 - Embedded heat load profiles into the deep learning architecture, reducing building energy consumption by 15%.

Key Projects

- E-Com Campaign Performance Prediction & Optimization** [*Python · Scikit-learn · React/Analytics Interface*]
- Built a prescriptive analytics model achieving 82% accuracy in customer volume predictions and sales surge detection.
 - Automated 65% of manual analysis by engineering an algorithm to prescribe optimal budgets, targets, and timing.
 - Designed an analytics dashboard for KPI monitoring, enabling stakeholders to identify & drill into optimization trends.
- AI-Driven Supply Chain Intelligence Platform** [*Python · Scikit-learn · XGBoost · SHAP · Next.js*]
- Engineered a 5-engine XGBoost system (forecasting, risk, scenario analysis) to optimize supply chain visibility.
 - Implemented SHAP analysis to ensure model interpretability, enabling data-driven stakeholder decision-making.

Research & Publication

- "ECOAVIA"- AI-Driven Hybrid Forecasting for Sustainable Aviation & Development** | ICISC 2026 [\[Link\]](#)
- Designed an ensemble model (XGBoost, ARIMA, LSTMs) integrating climate and infrastructure data to forecast aviation demand and support sustainable policy advisory.

Certifications

Udemy: Generative AI (LangChain & Hugging Face), Python Pro Bootcamp, Python & DSA
Anthropic Academy: Claude Code, Claude API, MCP, Prompt Engineering, AI Fluency, Safety & Evaluation
AWS: Machine Learning Foundations

Technical Skills

- Programming:** Python, SQL, PostgreSQL, Javascript
- Generative AI:** RAG, LLMops, Prompt Engineering, Model Fine-Tuning, MCP, LangGraph, LangChain
- Machine Learning:** Regression, XGBoost, Neural Networks, Scikit-learn, TensorFlow, PyTorch, SHAP
- Data Analytics:** Power BI, Tableau, ETL, KPI Reporting, Product Analytics, Data Modeling, Data Transformation & Validation, Anomaly Detection
- Front-End & UI/UX:** HTML, Tailwind CSS, Node.js
- MLOps & Deployment:** FastAPI, Docker, CI/CD, Model Monitoring, MLflow
- Tools & Applications:** Salesforce, Figma, Jira, Claude, Google Colab, MS Office
- Product & Methodology:** Business Requirements Analysis (BRD/FRD/ User Stories/Acceptance Criteria), Process Mapping, Requirements Gathering, Stakeholder Management & Communication, Cross-Functional Collaboration, Agile/Scrum & Waterfall, Technical Writing.

Education

SRM Institute of Science and Technology Chennai, TN
Bachelor of Technology (B.Tech) in Computer Science and Engineering (AI & ML) | **CGPA:** 8.18/10 2026
